

Phishing Awareness Training

Cyber Security Awareness

NAME – TARUN VERMA

COURSE – CYBER SECURITY BY CODEALPHA

Phishing is digital cheating. It is when a criminal sends a **fake message** (email, text, or call) to trick you into giving them your private information.

Think of it like this:

The Trap: A fake email that looks like it's from your Bank, Netflix etc.

The Trick: It asks you to "Click here" to fix a problem or win a prize.

The Theft: Once you click and enter your password, the criminal steals it.

Types Of Phishing -

- Email Phishing:** Fake mass emails (e.g., "Your Netflix account is locked").
- Spear Phishing:** A personalized attack sent specifically to YOU.
- Whaling:** Targeted at "Big Fish" like CEOs or Managers.
- Vishing:** Phishing via Voice Calls (asking for OTPs).
- Smishing:** Phishing via SMS/Text Messages with a fake link.

How to Recognize Phishing Emails ?

- **Check the Sender:** Look for typos in the email ID (e.g., micros0ft.com).
- **Hover Before Clicking:** Move your mouse over a link to see the real URL.
- **Panic Tactics:** Avoid emails that say "Urgent!" or "Account Locked!"
- **Generic Greeting:** They use "Dear Customer" instead of your real name.
- **Bad Grammar:** Look for spelling mistakes and strange English.

Social Engineering : “Human Hacking”

- Authority:** Pretending to be a Boss or IT Manager to demand action.
- Urgency:** Using "Hurry up!" or "Account Blocked!" to make you panic.
- Curiosity:** Using "Leaked" info or "Secret" files to make you click.
- Baiting:** Offering "Free Rewards" or "Bonuses" to hide a trap.
- Trust:** Using a friend's name or a familiar brand to lower your guard.

BEST PRACTICES TO PREVENT PHISHING ATTACKS

Safety Tips –

- Do not click on unknown Links .
- Always verify sender email.
- Use strong passwords.
- Enable Two-Factor Authentication.
- Keep software updated

Real World Example -

•**The Scenario:** An HR employee receives an email that looks exactly like it's from the company CEO.

•**The Message:** "I'm in a silent meeting and can't talk. I need you to purchase 10 Google Play gift cards for a client immediately. Send the codes to this email. I'll reimburse you by evening."

•**The Result:** The employee, wanting to be helpful to the boss, buys the cards. The attacker disappears with the money.

Quiz -

Q1. You receive an email from "Microsoft" saying your account will be deleted in 2 hours. What should you do?

A) Click the link immediately to save your account.

B) Reply to the email asking for more time.

C) Don't panic. Check the sender's email address and report it.

Q2. What does "Hovering" over a link help you see?

A) It makes the website load faster.

B) It shows the real destination URL at the bottom of the screen.

C) It automatically deletes the virus.

Q3. Your "Boss" sends an urgent text asking for your personal OTP. Is this safe?

A) Yes, because it's my boss.

B) No. Real companies and managers will NEVER ask for your OTP.

C) Yes, if they say it's an emergency.

Q4. Which of these is a sign of a fake website?

A) The logo looks blurry or old.

B) The URL is wells Fargo-update.net instead of wells Fargo.com.

C) Both A and B.

THANK YOU
